MISSION

To anticipate the healthcare needs of the Texas community and respond by recruiting and educating a diverse group of quality laboratory professionals and fostering collaborative relationships that generates new knowledge through innovative methodologies, research, and education.

VISION

To enhance the community of healthcare through the quality of our graduates, scholarly activities, collaborative efforts, and community interactions.

GOALS

Through creative resource development, utilization, and allocation, we will create an innovative learning environment producing leaders in healthcare.

We are a team committed to continuous self-improvement that supports trusting, open, and honest relationships.
